STEP 3: Connect Devices to Adaptor

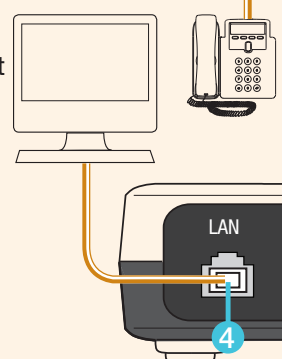

The Adaptor allows for the connection of up to any two of the following devices: Traditional Phone, Cordless Phone, Dedicated Fax Machine, or an All-In-One Printer with Fax.

A. Connect the Internet cable to the port labelled **1** in the diagram below. Connect your home phone device(s) to either port labelled **2** or **3**.

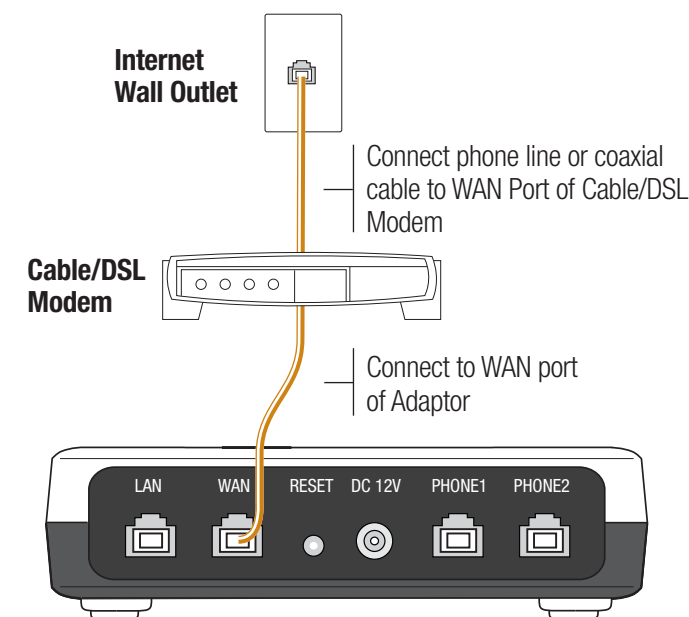

B. Optional Step

Your Adaptor allows you to connect your PC to the Internet. Connect your computer to the Internet by inserting the Internet cable into the port marked **4** on the illustration to the right. Insert the other end of the Internet cable into the Internet (network) port on the back of your computer.

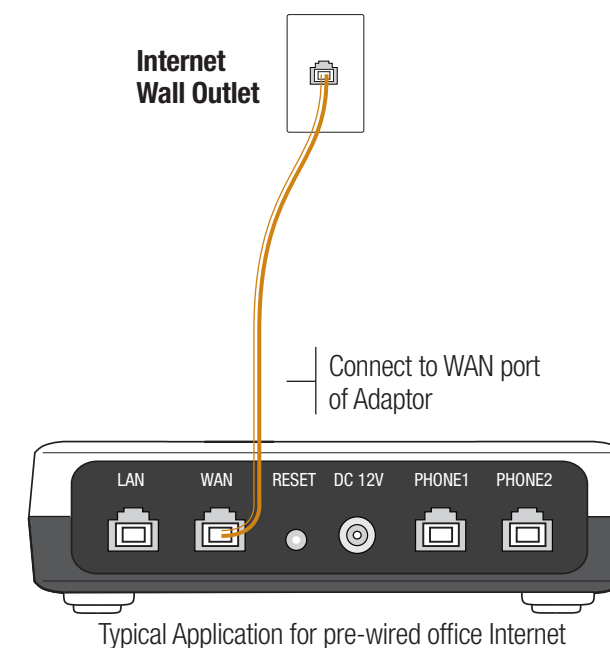

STEP 2: Adaptor to Internet

OPTION: A Cable/DSL Modem Connection to Internet

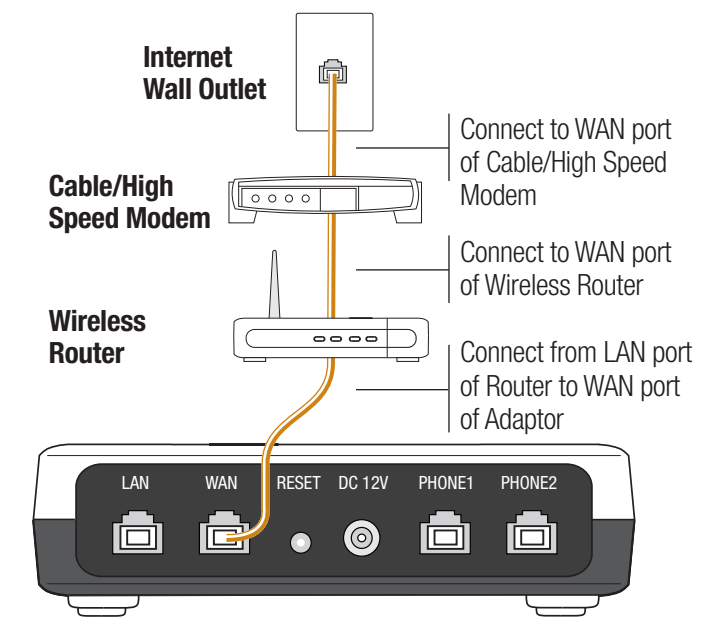

or

OPTION: B Internet Outlet Connection to Internet

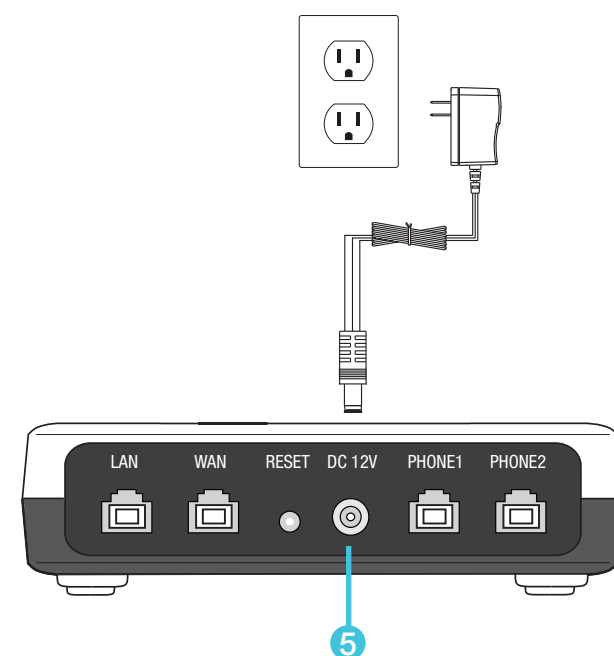

or

OPTION: C Wireless Router Connection to Internet

STEP 4: Connect Power to Adaptor

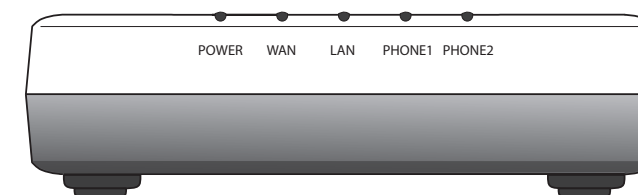

Insert the round end of the power cord into the port marked **5** on the illustration below. Plug the power cord into a 110 AC power outlet (wall socket). Your Adaptor will begin updating the configuration.

STEP 5: Wait for Initialization

After connecting the power cord, the power light will display a steady green. After connecting to the WAN port, the green WAN light will flicker. (The LAN green light will also flicker if you have connected a device to the LAN port.)

Once these connections are made, please wait 10 minutes for your Adaptor to complete initialization. Following initialization (10 minutes), your Adaptor is ready for use.

If you do not receive a dial tone after the initialization is complete please call VoIP Customer Support at 1.855.211.2255 or 1.855.211.CALL.
